
Re: Reference for Sanket Baraiya - Automation Engineer

We are pleased to provide this reference for **Sanket Baraiya**, who has served as our automation engineer **Jan 2026**, supporting **Klikvast** operations on an ongoing retainer basis.

Over the course of our engagement, Sanket designed and maintained several automated workflows for our business, including **billing and invoicing, lead management, social media publishing, etc.** He worked primarily in Make and n8n and built custom scripts whenever the platforms alone weren't enough to solve the problem.

Since these automations went live, we've been able to significantly reduce the time our team spends on manual, repetitive tasks, and have seen a noticeable improvement in accuracy and consistency across our processes.

Sanket is responsive, communicates clearly, and takes ownership of the systems he builds also including ongoing monitoring and troubleshooting well after initial delivery. We have found him easy to work with across time zones, and we would recommend him without hesitation to any business looking to automate manual processes.

Sincerely,

Tim Meulman - CEO
